TierPoint Announces Provisioning of Optical 10Gbps OC-192 Carrier Diverse Protected Circuit between Seattle and TierPoint

(Liberty Lake, Wash.) – September 1, 2009—TierPoint today announced the provisioning of an optical 10 Gigabit OC-192 protected and carrier and path diverse circuit between Seattle and TierPoint for added resiliency. This state-of-the-art fiber optic network provides robust connectivity between the Westin in Seattle and the TierPoint data centers in Liberty Lake, WA. It further solidifies and enhances TierPoint’s position as the premier regional business continuity data center provider in the Northwest.

“This newly provisioned service is a private and diverse route directly between our data centers in Liberty Lake and the Seattle market. It will allow more capacity for our customers to securely backhaul their data into our facility,” said Dan Seliger, partner at TierPoint. “Many customers have been asking about a service like this, and we are now proud to have it available.”

“We are in the business of delivering uptime, so this service is really important to our customers,” added Octavio Morales, partner at TierPoint. “Business Continuity implementations require off-site replication, which are also typically constrained by backup windows, so connectivity needs to be plentiful and it needs to be available on demand. Likewise, true network diversity implies having more than one carrier – relying on more than one piece of equipment or network device; more than one UPS, diesel generator, etc. We are thrilled to provide our customers with end-to-end diversity as they become increasingly reliant on technology and on TierPoint to grow their business.”

To learn more about TierPoint’s optical 10Gbps OC-192 carrier and path diverse protected circuit and how it can help your business, please contact TierPoint at (509) 688-2555.

About TierPoint

TierPoint LLC has rapidly become the premier Business Continuity Data Center and Carrier Hotel in the Inland Northwest. Backed by Bernard Daines, an industry visionary with a proven history of entrepreneurial successes, TierPoint empowers businesses with mission critical
