

Data Center

OKC - OKLAHOMA CITY (DCI00)

TierPoint helps your organization manage risk, drive performance and improve agility. Our state-of-the-art facility, located in the heart of the nation's energy belt, is part of a nationwide network of data centers that share our commitment to:

1. Carrier Neutrality and Redundancy

By having many on-net carriers and by supporting cross connects to other carriers, you get access to the Internet bandwidth and connectivity services of your choice.

2. Security and Compliance

Equally important is a company-wide emphasis on security and compliance including the establishment of a national office to define and deploy information security best practices to serve client needs.

3. Responsiveness and Expertise

All of our data centers are supported by people who are passionate about client success, responsive to unique client requirements and have the technical expertise and desire to help clients achieve their business goals.

DATA CENTER HIGHLIGHTS

- Interconnectivity between TierPoint DCI00 and DC200 via multiple private fiber paths for connectivity and redundancy
- Concrete tilt up building and complex roof structure designed to withstand 165 MPH straight winds
- Staffed 24x7x365 with biometric authentication and escorted access within the data center
- Located within TierPoint-owned secure 15 acre campus less than 15 minutes from airport and 10 minutes from downtown
- Precision cooling system can support up to 20kW in a single rack
- Redundant power configuration consisting of multiple utility feeds, generators, UPS systems and PDUs
- 230 sq. ft. customer build room for unpacking and staging of equipment prior to installation

TierPoint's OKC - Oklahoma City (DCI00) facility is audited under SSAE 18 SOC 2 Type II, PCI-DSS*, GLBA and HIPAA standards annually and is ITAR and EU-US Privacy Shield registered.

* PCI-DSS – Certification on PCI-DSS Requirement 9 & 12 (Physical Security and Information Security Policies) on data center (colocation) services. Colocation provides secure space, power, and environmental controls for merchants and service providers, some of which fall under PCI compliance. No logical access to any customer systems that may contain cardholder data.
