

Data Center

TUL - TULSA (STATE FARM)

TierPoint helps your organization manage risk, drive performance and improve agility. Our state-of-the-art facility, located in the heart of the nation's energy belt, is part of a nationwide network of data centers that share our commitment to:

1. Carrier Neutrality and Redundancy

By having many on-net carriers and by supporting cross connects to other carriers, you get access to the Internet bandwidth and connectivity services of your choice.

2. Security and Compliance

Equally important is a company-wide emphasis on security and compliance including the establishment of a national office to define and deploy information security best practices to serve client needs.

3. Responsiveness and Expertise

All of our data centers are supported by people who are passionate about client success, responsive to unique client requirements and have the technical expertise and desire to help clients achieve their business goals.

DATA CENTER HIGHLIGHTS

- Dark fiber connectivity to TierPoint's second data center in downtown Tulsa as well as TierPoint's Oklahoma City facilities
- Uptime Institute Tier III certified
- Connected to TierPoint's private, internal network for numerous replication and online backup options, plus easy access to additional managed services
- Advanced security profile with 24x7 on-site security staff, biometric access and physical ID checks
- 2N power through diverse redundant utility connections feeding two (2) autonomous power plants, each with 2.5MW of utility power serviced by two (2) backup diesel emergency generators on standby
- N+1 Vertiv DSE HVAC cooling units with air-side economizers

TierPoint's TUL - Tulsa (State Farm) facility is audited under SSAE 18 SOC 2 Type II, PCI-DSS*, GLBA and HIPAA standards annually, as well as ITAR and EU-US Privacy Shield registered.

* PCI-DSS – Certification on PCI-DSS Requirement 9 & 12 (Physical Security and Information Security Policies) on data center (colocation) services. Colocation provides secure space, power, and environmental controls for merchants and service providers, some of which fall under PCI compliance. No logical access to any customer systems that may contain cardholder data.
